SMD Power Inductor NR - 3015-Series (Ferrite)

Features & Application

· Mounting on the surface of NR inductors has high power current sensing.

· NR inductors are small in size and are miniaturized products,

but the chip inductors have high quality, huge storage capacity and low resistance characteristics

 $\cdot\,$ Surface mount high power inductors.

 \cdot Reel packaging is available for automatic surface mounting.

 \cdot It has the characteristics of high Q value and low impedance

Low magnetic leakage, low direct resistance, high current resistance and a series of features.

It is widely used in notebook computers, desktop computers, servers, plug-ins,

TVs, smart homes, LED lighting, automotive products, wireless remote control systems,

low-voltage power supply modules and other electronic equipment.

 \bigstar When ordering, please check part number

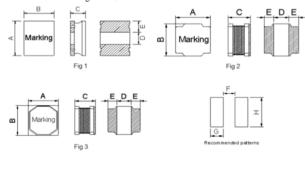

Part Number	Inductance @1MHz,0.25V (uH)	DCR (Max) (Ω)	Isat (Max.) (A)	Irms (Max.) (A)	SRF MHz (min)

unit	: mm

Impedance/Inductance/Q/	LCR Angilent E4991A	
Resistance DC	Chroma 16502	
Current per winding that causes a 20°C rise from 25°C ambient		
Electrical specifications at 25°C		

Weight 45 – 49 mg

Packaging 2000/7 " reel; Plastic tape: 8 mm wide.

Packaging will different, accroding the various chip size.

BINGRI TECH

SMD Power Inductor NR - 3015-Series (Ferrite)

GENERAL CHARACTERISTICS

1. Operating temperature range: $-40 \text{ TO} + 125 \degree C$ (Includes temperature when the coil is heated)

2. External appearance: On visual inspection, the coil has no external defects.

3. Terminal strength: After soldering. Between copper plate and terminals of coil. Push in two directions of X.Ywithstanding at below conditions.

Terminal should not peel off. (refer to figure at right) 0.5kg Min -3015

4. Insulating resistance: Over 100M Ω at 100V D.C. between coil and co

5. Dielectric strength: No dielectric breakdown at 100V D.C. for 1 minute between coil and core

6. Temperature characteristics: Inductance coefficient (0~2,000)x10-6/ ($^\circ\!C$ -25~+80). $^\circ\!C$, inductance deviation within±5.0%, after 96 hours.

7. Humidity characteristics(Moisture Resistance): Inductance deviation within $\pm 5\%$, after 96 hours in 90~95% relative humidity at 40 ± 2 and 1 hour drying under normal condition.

8. Vibration resistance: Inductance deviation within $\pm 5\%$, after vibration for 1 hour. In each of three orientations at sweep vibration (10~55~10 Hz) with 1.5mm P-P amplitudes.

9. Shock resistance: Inductance deviation within $\pm 5\%$, after being dropped once with 981 m/s²

(100G) shock attitude upon a rubber block method shock testing machine, in three different

10. Resistance to Soldering Heat: 260, 10 seconds(See attached recommend reflow)

11. Storage environment: Storage condition: Temperature Range: $10 \sim 35$ (Generally: $21 \sim 31$),

Humidity Range: $50\% \sim 80\%$ RH (Generally: $65\% \sim 75\%)$; Transportation condition:

Temperature Range:-35 ~ 85 , Humidity Range: 50% $\sim 95\%$ RH

12. Use components within 12 months. If 12 months or more have elapsed, check soldarability before use. 13. Reflow profile recommend:
